

## BUILDING TOMORROW SHAPING TODAY

We safely provide industrial services for greenfield, brownfield, and sustaining capital projects in Western Canada.

### EXTRACT MAXIMUM VALUE FROM YOUR ASSETS

#### MAINTENANCE + TURNAROUNDS + SHUTDOWNS

Our objective is to continually enhance and maintain the performance of our clients' industrial assets. Through experience and technology, we consistently deliver sustainable improvements, minimizing downtime and rapidly restoring assets to their optimal operational state.

### EXPERIENCE THAT DELIVERS

#### FACILITY + PIPELINE CONSTRUCTION

Specializing in facility and pipeline construction for the energy and mining sectors, Northwest Industrial is focused on delivering industry-leading services. From planning to completion, our team ensures projects meet stringent standards, guaranteeing efficiency and safety.

### CONTROL ACROSS THE SUPPLY CHAIN

#### PIPING + STRUCTURAL FABRICATION SUPPORT

For seamless project execution, we offer comprehensive fabrication support services. With precision, efficiency and safety at the core of our values, we fabricate process piping and structural components of uncompromising quality tailored to your project's needs.

## A CULTURE OF SAFETY

# SAFE – NOT SORRY

We make no apologies for being safe. We believe that no job is ever so urgent that we can't take the time to stop, think and plan for its safe execution. Safety is always part of the process.

### OUR EXPERTISE

## COMPLETE ASSET LIFECYCLE SUPPORT

With decades of hands-on experience in construction management and project planning, our team adds significant value to the design and execution of projects. We can provide as much or as little support as you require throughout the lifecycle of your assets, including:

- + Plant Maintenance
- + Shutdowns & Turnarounds
- + Environmental Reclamation
- + Facility & Pipeline Installation
- + Integrity Services
- + Fabrication Support
- + Constructability Services
- + Project Site Staffing
- + Pre/Post Commissioning Support
