We believe the oil and gas industry in Canada deserves to be connected

Our vision is to be the oil and gas industry portal in North America

A new and innovative SMART search engine for the oil and gas industry in Canada

The smart oil & gas search

oilgaspages.com

Why do oil and gas companies and those who service them need oilgaspages.com?

To Save Time

Oil and gas industry professionals have traditionally relied on word of mouth to find services and products. Industry professionals can find companies faster, complete projects faster and most importantly increase productivity with oilgaspages.com. Engineers that have used oilgaspages.com have advised they have been successful at locating companies faster than traditional methods they have used.

Utilizing New Technology / Part of the Future / Evolution of the Industry

Oilgaspages.com features new and exciting technology to develop our website. For example, if a user searches for 'mud', the oilgaspages.com search engine will determine that the user is looking for 'drilling fluids'. Oilgaspages.com is an intelligent search engine allowing the user to quickly and effectively find what they are looking for without having to know the exact oil and gas industry terminology or category names.

To Advertise and Build your Brand

Traditional methods of advertising are becoming less effective. Companies need to locate more innovative solutions to market their products and services. Those who service the oil and gas industry can advertise their services and products to the right target market using oilgaspages.com. This includes all companies that are located in rural areas that can supply goods and services to the oil and gas industry. This also includes mid to large size companies who wish to drive more traffic to their business or to continue brand building.

To CONNECT with others in the oil and gas industry in Canada

Most of the companies that are in the oil and gas industry and related service companies across Canada are located on oilgaspages.com. It is common practice for equipment and services to be bid out and these bid lists range from 3-5+ companies. Engineers and other oil and gas service professionals are always looking for additional companies to add to their bid lists. However, it is not an easy task to find alternate companies that provide required products and services. Some companies may already have a set vendor list and are not aware that other options exist. Oilgaspages.com allows professionals to research other companies in order to find the best ones suited for their needs and budgets.

How does oilgaspages.com Work?

Oilgaspages.com uses a sophisticated patent pending intelligent search engine that determines which product or service a user is seeking. The intelligent search engine then connects users with the associated companies that provide these products or services. **Search for any category particular to the oil and gas industry in the main search engine page.**

1. SEARCH FIELD

Front page where you can search different categories... ie. "Valves". A drop down menu will show the different categories related to "Valves" you can choose from.

2. FEATURED ADS

Companies can post messages, corporate news and even equipment sales in featured ads. (Maximum characters apply here to such ads.)
